

## REMARKS

Claims 1-10 and 13-19 were pending in the application. The Examiner has objected to the Title of the Invention as not descriptive. By the present amendment, Applicants submit an amended Title of the Invention for approval by the Examiner.

The Examiner has objected to Claims 13-19 due to the mis-numbering of those claims. By this amendment, Applicants submit amendments to correct the numbers of the claims 13-19 to recite sequential numbers 12-18.

Applicants thank the Examiner for pointing out the typographical error.

The Examiner has rejected Claims 1-11 and 13-19 under 35 USC 112 as being indefinite. By this amendment, Applicants have amended the language of independent Claims 1, 7 and 19 (now 18) to recite steps and means for assigning frame alteration commands at relative positions with respect to at least one layer of the layered structure and for adjusting the relative positions of the frame alteration commands to adjusted relative positions, in correspondence to previously assigned frame alteration commands with respect to the at least one layer. Support for the claims' amendments is found, for example, from page

9, line 30-page 11, line 20. Applicants believe that the claims' amendments address the indefiniteness concern.

Claim 19, now Claim 18, has been rejected under 35 USC 101 as directed to non-statutory subject matter. Applicants have amended the language of Claim 19/18 to appropriately recite that the program of instructions is stored on the computer readable program storage device.

Based on the foregoing amendments and remarks, Applicants respectfully request entry of the amendment, withdrawal of the rejections, and issuance of the claims.

Respectfully submitted,  
Gabrani, et al
